Global Health Corps

Global Health Corps aims to mobilize a global community of emerging leaders to build the movement for health equity. GHC believes that a global movement of individuals and organizations is necessary in order to change the unacceptable status quo of extreme health inequities. GHC works to strengthen this movement by recruiting, training, and supporting the movement’s future leaders. GHC provides opportunities for young professionals from diverse backgrounds to work on the frontlines of the fight for global health equity in year-long fellowships. Our fellows have a measurable impact on the health of the communities in which they work, and draw upon that experience and the GHC alumni network to deepen their impact throughout their careers.
